**Lds Guide to Scouting in the Primary** Joanne H. Osmond, 2011-10-01 Scouting in the Church of Jesus Christ of Latter-day Saints follows guidelines from Church Headquarters in Salt Lake City. The 2011 Scouting Handbook for Church Units in the United States describes the Church's relationship to Cub Scouting and how to use the program as the youth program for boys eight - ten years old. It also explains the Boy Scouting program for boys eleven - eighteen. The keys to a successful Scouting experience are: 1) understanding the value of Scouting in preparing boys to live the gospel principles, 2) parent involvement, and 3) a commitment to Scouting by ward and stake leadership. Unit leaders in Cub Scout, Boy Scout, Varsity, and Venturing need training not only through the Boy Scout training programs but also by Church leaders with a firm foundation of the purpose and potential of Scouting in shaping the lives of boys and young men. Although the aims of BSA and the Church are essentially the same, there are differences in the implementation of the program. Boys enter and move through the ranks based on their birth date requiring a different approach to program planning than currently offered by the Boy Scouts of America. Many Cub Scout packs outside the LDS Church plan their program based on the school year with Cub Scouts moving from one rank to another depending on their grade in school. These units plan for the boys to advance together and graduate in February into Boy Scouts, while LDS boys advance to the next rank on their birthday. Cross over ceremonies occur throughout the year and happen when the boy turns eleven and joins the eleven-year-old Scout patrol. Packs chartered by wards in the Church do not participate in Tiger Cubs nor do they participate in over-night camping even for Webelos; an all-day hike will meet the requirement for Arrow of Light. Recruitment, funding, and basic procedures are tailored to the specific needs of our stakes and wards. The LDS program defined in this guide utilizes achievements and

activities that focus on the monthly core values. Because many of the LDS packs are small, typically all of the Cub Scouts meet together to work on rank requirements. Wolf, Bear, and Webelos activities are grouped together and align with the core values and Faith in God. For example, in September all three ranks worked on Fitness and Sports. Starting with a firm foundation of LDS Scouting, the Academic and Sports Program Guide plus song, activity, ceremony, and other publications are useful resources to use in planning a meaningful Cub Scout program. Using a flexible calendar and planning the year based on the needs of the boys, LDS units provide an exceptional Scouting experience for Cub Scouts and Boy Scouts with an excellent record of advancement and retention.

*The Truth Machine* Paul Vigna, Michael J. Casey, 2018-02-27 Views differ on bitcoin, but few doubt the transformative potential of Blockchain technology. The Truth Machine is the best book so far on what has happened and what may come along. It demands the attention of anyone concerned with our economic future. —Lawrence H. Summers, Charles W. Eliot University Professor and President Emeritus at Harvard, Former Treasury Secretary From Michael J. Casey and Paul Vigna, the authors of *The Age of Cryptocurrency*, comes the definitive work on the Internet's Next Big Thing: The Blockchain. Big banks have grown bigger and more entrenched. Privacy exists only until the next hack. Credit card fraud is a fact of life. Many of the "legacy systems" once designed to make our lives easier and our economy more efficient are no longer up to the task. Yet there is a way past all this—a new kind of operating system with the potential to revolutionize vast swaths of our economy: the blockchain. In *The Truth Machine*, Michael J. Casey and Paul Vigna demystify the blockchain and explain why it can restore personal control over our data, assets, and identities; grant billions of excluded people access to the global economy; and shift the balance of power to revive society's faith in itself. They reveal the disruption it promises for industries including finance, tech, legal, and shipping. Casey and Vigna expose the challenge of replacing trusted (and not-so-trusted) institutions on which we've relied for centuries with a radical model that bypasses them. The Truth Machine reveals the empowerment possible when self-interested middlemen give way to the transparency of the blockchain, while highlighting the job losses, assertion of special interests, and threat to social cohesion that will accompany this shift. With the same balanced perspective they brought to *The Age of Cryptocurrency*, Casey and Vigna show why we all must care about the path that blockchain technology takes—moving humanity forward, not backward.

The Fourth Industrial Revolution Klaus Schwab,2017-01-03 World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “smart factories” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.
